LSS in Colorectal Surgery

Laparoscopic Surgical Skills in Colorectal Surgery

Learning Objectives

This is a validated and structured laparoscopic surgical skills hands-on workshop using animal models. The course precedes the Challenges in Coloproctology Course on 9th December 2016 and participants are expected to attend.

The LSS team have developed, validated and implemented an educational and training curriculum and proficiency assessment tool with an associated E-Learning platform

Participants must show logbook evidence of proficiency in laparoscopic cholecystectomy and appendicectomy (Grade 1) in order to take part in the Grade 2 Colorectal Surgery module

This hands-on course is limited to six trainees only

TARGET AUDIENCE

Participants:
ST6+ Colorectal Surgery Trainees

Free course

(By Application Only)
